

Assess, Transform & Manage

Succeed with NextPoint. Optimize your IT function with the **Next-ATM** service.

Assess: NextPoint assesses your IT and compares your performance with best practices and your industry peers. NextPoint presents these results in a comprehensive report which:

- baselines and benchmarks your IT
- outlines opportunities to save money, improve processes and optimize your IT function.

Transform: NextPoint transforms your IT to realize cost savings and other benefits. NextPoint recommends a course of action & executes it in a cost and time effective plan.

Manage: NextPoint manages your IT effectively by providing on-going guidance and assistance to manage both strategically and tactically. NextPoint provides resources from a purely advisory capacity through to a fully "managed" solution.

Disaster Recovery

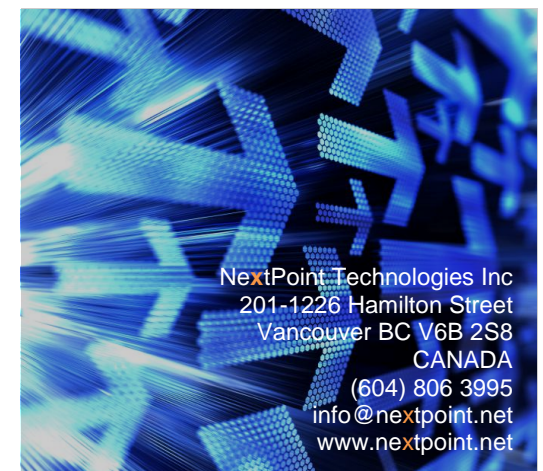

Can you recover your IT systems in the event of a disaster? How long would it take? How much data would you lose? Can you survive without mission critical applications? Will your customers wait for you to get back on-line?

NEXT-DRP is an affordable real-time hosted 'on demand' Disaster Recovery solution for small to medium sized businesses.

Using best in class patented replication technology by Data Domain®, your mission critical data is continuously captured and replicated to our secure datacenter location using the minimum of bandwidth.

Our solutions are efficient on your resources and are server, storage and network independent.

Our solutions can be quickly implemented to start providing your business the level of protection it needs.

Business Intelligence

Most companies have data that they rely on everyday to operate and make decisions. Whether you are relying on spreadsheets, custom reports or database queries, you are using Business Intelligence.

NEXT-BI is a managed solution to manage, secure and share business reports, dashboards, scorecards and analysis. A consolidated BI solution can eliminate errors, duplication and countless hours of effort. Anyone who needs information to perform their job or understand their business can benefit.

Access the right key data & information whenever it is needed - monthly, daily or by the hour. NEXT- BI lets you benefit from best in class technologies for an easy to understand monthly subscription.

Securely access all of your BI assets on the web using a PC, notebook or mobile device.

Datacenter Management

If you want to cut back on the amount of power your IT systems use, you first need to know the current consumption.

NEXT-DCM is an affordable Data Center Management solution. Powered by RACKWISE, this solution provides modeling, planning and documentation of the organization's datacenter. Metrics including weight, power, heat modules and ports are collected. These metrics allow for IT managers and network administrators to better visualize, document, analyze and manage their datacenter and its resources.

NextPoint also offers an optional on-site service with our team of professionals to collect data and system information to reduce risk and simplify implementation.

Next-DCM is available through an affordable monthly subscription.

Database Management

Is your company able to properly administer and support all the mission critical databases your business relies on?

NEXT-DBMAN is an affordable and flexible Database Management solution for businesses of all sizes, designed to be customizable so you pay only for the support or service your business needs.

On average this costs 35% to 60% less than a fully loaded DBA. Whether you decide it's finally time to find a full time DBA, just need to augment your current staff or want to get off-hour and vacation coverage, the level of service for your monitored databases can be set based upon your unique business requirements.

Our database specialists have a wide breadth of experience, knowledge and resources available to share with your staff. Or, they can simply take care of your databases for you.
